

SERIES ICE

Automatic monobloc rotary bottling machine for filling and capping bottles, suitable for corrosive and non-corrosive liquids.

Technical Features

- Bottle infeed by conveyor belt
- Incoming bottle check device
- Gravity volumetric filling
- Pneumatic valves with no-drop system, Viton seals
- Bottle/liquid check device
- Continuous adjustment variable speed drive
- Cap feed vibrating selector with automatic cap pick and placing on the bottle
- Capping by rotary pneumatic cylinder with control photocell
- Bottle outfeed by conveyor belt.

Structure

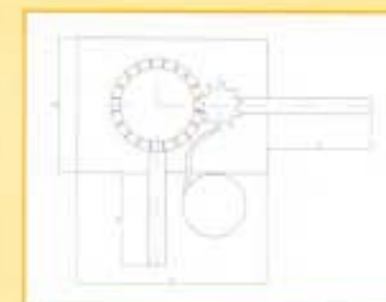

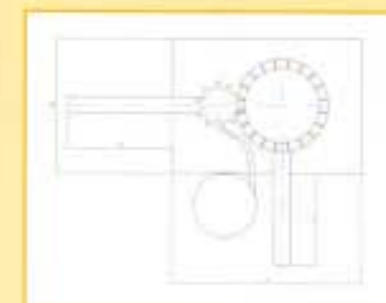

Stainless steel, polyethylene, polypropylene, PVC, Plexiglas, anticorodal, according to the chemical features of the product to fill. Acid proof varnish.

Optional

Bottle size changeover, cap size changeover, bottles accumulation table.

Power

400/230/24 + compressed air.

MODEL	Filling Heads	Capping Heads	Filling	Dosing range	Capacity l/hour	Overall dimensions			
						A	B	C	H
